# Altura Business Continuity

## Avaya and Nortel data recovery services

*Do you have a business continuity plan?*

*What would the cost be to your business during an interruption?*

*What would happen to your data in the event of a disaster or cyberattack?*

*Could you rebuild each key, feature, set, and trunk?*

As part of your business continuity plan, you can depend on Altura for your Avaya or Nortel data recovery needs. During the initial planning and consulting phase, Altura will conduct a risk assessment of your current communication and data capabilities. We assess any gaps and incorporate the required corrective actions. Altura will also administer and support your managed storage needs for Avaya or Nortel systems. Protect your data with our remote, seamless, and secure back-up service.

### Immediate Benefits Include:

- Risk assessment of current communication capabilities and gaps
- Strategy for planned design and system architecture
- Data back-ups for Avaya and Nortel PBX systems
- Remote data back-ups scheduled according to business need and contingency requirements
- Storage of back-ups in off-site and secure data centers

**Let Altura protect your critical systems data!**
